DETAILED ACTION

Allowable Subject Matter

1. Claims 31-37 are allowed. The following is an examiner's statement of reasons for allowance: Prior art references teach providing a covering for injured limbs.

Andrews et al. (U.S. 5,437,621) as pictured a boot comprising a plastic material and absorbent layers. Andrews however teaches away from providing a warm and moist environment in column 6, lines 54-57 stating the desirability of wicking away moisture to provide a dry environment.

2. Botha (U.S. 5,395,302) teaches an example of a plastic protective enclosure including fastening means, but fails to teach an absorbent layer. Furthermore, Botha does not address wound healing.

3. Orange (U.S. 5,817,038)

teaches a device to be used in wound healing including a plastic enclosure. Orange fails to teach a closed end. Orange further teaches away from providing a warm moist environment to promote wound healing.

4. Scully et al. (U.S. 6,077,526) teach the desirability providing a warm and moist environment in order to promote wound healing. Scully however, teaches a dressing, and fails to teach or make obvious providing a plastic enclosure having a closeable first end, and a closed second end with a fluid-absorbent material at the closed end to thereby promote wound healing by providing a warm and moist environment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
